*Qimat Shua'a Altaaqa Company Is Limited Liability Company Specialized in General Contracting, Building and Infrastructure Construction, as well as Mechanical, Electrical and Civil Works.*

## **WORD OF THE MANAGING DIRECTOR**

It is our pleasure to introduce to you and introduce you to our company and its basic concepts for civil and construction works in our company Qimat Shua'a ALTaaqa Company. We take upon ourselves all the commitments to the highest levels. Our goal is to reach beyond what you hope to achieve and our desire is the satisfaction of our customers and clients.

Our company devotes its efforts to what goes beyond contractual agreements and completes our projects and commitments in a way that matches what is required we strive to be our customers' first choice in construction and construction. Since its establishment, the company aims to achieve excellence and leadership in the development projects that we implement in a way that contributes to achieving growth and comprehensive well-being in various fields. Proper planning and good management have been the greatest credit to the success of the company's business. Not only that, the availability of the efficient human element and standing side by side with practical experiences The most important policy that the company pursues in order to achieve a better implementation of projects, and the combination of the scientific and academic methods with long experience and knowledge made it achieve a high position in the construction and trade market.

While we are proud of our constructive achievements today, we look forward with confidence to a brighter future... the future of building our hands and reaping its fruits for tomorrow's generations.

*Managing Director*

## **ABOUT US**

### **QIMAT SHUA'A ALTAAQA COMPANY**

Qimat Shua'a Altaaqa Company for General Contracting, Public Transport, Agricultural Services & Food Suppling and Fishing Ltd , was established in the province of Baghdad in 2009 and therefore in response to the urgent requirements in the reconstruction and development of infrastructure throughout Iraq. It was classified by the Iraqi Ministry of Planning as a classification company (fifth class construction) and (fifth class electrical and mechanical) with a capital of (5,000 .000.000) five billion Iraqi dinars.

In addition, our company deals with all general contracts in all different fields of business and all general contracting in the implementation, supervision, design and processing of the required materials according to type, origin and demand, and the company is a member of the Iraqi Contractors Union and the Baghdad Chamber of Commerce.

As the founder of this company is highly specialized in the field of contracting, general trade and public transport, and he has high and advanced experience for many years in this field.

The company consists of engineering cadres in all specializations, including engineering (Civil -Architectural - Electrical - Mechanical). In addition to the administrative cadres that make up the company's structure and the structure of any project affiliated with the company, in addition to the technical cadres for all specializations and as needed.

The company has multiple goals in its field of work, including contributing to the construction and development of the new Iraq and the development of engineering and technical cadres by sending them qualification courses and missions outside Iraq and according to the requirements of any project and the requirements of any work ,In order to eliminate unemployment, the company has engaged multiple cadres with different specializations to advance the Iraqi economy, in addition to having future goals in construction and development at the regional level.

Qimat Shua'a Altaaqa Company has adopted modern and advanced methods in administrative and executive work, in order to compete for advanced positions among companies contributing to the construction and reconstruction of Iraq. Drawing the exact path for obtaining international engineering specifications.

The preparation of engineering designs for projects is an essential part of our work, as it is carried out by a selection of local and foreign designers according to the requirements of the project in order to reach the technical levels.

## **QIMAT SHUA'A ALTAQA COMPANY**

for General Contracting, Public Transport, Agricultural Services  
& Food Suppling and Fishing Ltd

### ■ ■ ■ *Vision:*

We seek to become the leading company in the contracting sector in Iraq and the Middle East in general. By developing the construction sector with the highest possible quality. We also seek to be the Qimat Shua'a Altaaqa Company that pays the greatest attention to human resources, health and safety, and has leadership in the management and implementation of projects, whether at the level of the private or public sector, using the latest construction equipment and modern technology in implementation, as well as specialized programs in project management in the management and implementation of our engineers who represent The main base for the success of our company, which always seeks to qualify, encourage and develop their performance and expertise so that they can achieve the objectives of our company in reaching the highest levels of quality and accuracy, with the highest degree of care in implementing the safety and security system.

### ■ ■ ■ *Important:*

Team spirit

2

Staff  
Development

1

Outstanding  
Performance

## MAIN ACTIVITY

The company specializes in the full management of industrial projects, commercial buildings, residential buildings of both horizontal and vertical types, schools, universities, education, entertainment and marketing centers, mosques and places of worship. The company also implements all infrastructure projects for cities and roads, and implements networks for laying drinking water pipes, desalination plants of all kinds, heavy water networks, rainwater drainage networks, irrigation and drainage projects, in addition to that our company implements all electrical projects from laying and installing electricity networks and all industrial works. Small and large dams and the implementation of all projects of bridges, arches, highways and city roads, where our staff of engineers and surveyors has high experience in all areas of the construction industry, which helps them to prepare the infrastructure of offices, factories, workshops, machinery, a section for transport and warehouses, and these sections are equipped with all supplies and equipment.

In addition, the company has a side in the field of general trade in terms of importing all construction materials, machinery and equipment, importing electrical transformers and their accessories, importing modern medical devices, office furniture and all that includes the field of import.

In addition, the company is distinguished in the transportation business, as it has an integrated fleet to transport goods and equipment by providing a specialized cadre of qualified drivers with the conditions of professional safety at work and to maintain and deliver them on time., Our working teams in all their forms are trained, prepared and

## **QIMAT SHUA'A ALTAAQA COMPANY**

for General Contracting, Public Transport, Agricultural Services  
& Food Suppling and Fishing Ltd

supported by good technical competencies and complete environmental knowledge in how to deal and coexist with the work environment in all regions of Iraq, defying the difficulties and security conditions to obtain the highest international standard specifications.

From the beginning, the company has endeavored to be at the forefront of companies specialized in infrastructure, in all its names and forms, to work diligently side by side with local and international companies in order to secure safety and security requirements and to confirm the tributaries and foundations of quality control by organizing standard and quarterly training courses for its affiliates and working teams.

We also consider that winning the confidence of our business partners, whether they are customers, suppliers, employees, or the entire community, is essential to our continued success.

As for the field of investment and trade in agricultural materials, which includes the establishment of agricultural fields of all kinds to produce summer and winter crops and work on their development and the establishment of reservoirs, irrigation, drainage, veterinary and other works related to the company's activity in the agricultural field.

The company also has workers in the field of food supplies, and this field includes processing all kinds of food, whether in metal or glass cans or plastic containers, and marketing them in the local and foreign market.

## TEAMWORK

We are one team, and we recognize that our -success is only possible through the collaborative efforts of our people.

We will develop our people through training, reward performance and create a working environment in which our people are challenged, motivated, satisfied and accountable for their work

### *QUALITY POLICY*

- To deliver our clients the standards of quality specified in the contract within budget.
- To create and maintain a culture of quality within the group.
- To ensure that all our employees are trained in quality assurance and that this training is ongoing process at all levels.
- To provide the resources necessary to achieve the required level of quality.
- To ensure that quality control mechanisms are being sufficiently and effectively applied at all times and levels.
- To provide documentary evidence of all quality control measures.
- To ensure that all consultants, suppliers, sub- contractors and others who are involved in our projects meet the required quality standards.
- To continually review, improve and implement quality control and best practice procedures as per internationally accepted standards.

## QUALITY POLICY

In pursuit of our goals, we implement the following principals:

- We conduct our activities within the law and the requirements of the statutory. We are always striving to minimize the detrimental impacts of our projects on environment at large.

■ We encourage sub-contractors and suppliers to pursue best practices and to apply environmental friendly solutions.

Our related team meant for the job consistently sharing knowledge with our employees to make them abreast with up to date information for friendly working solutions in all respects.

Qimat Shua'a Altaaqa Company believes in safe environment i.e. pollution free conditions to lead to better life, healthy conditions and eventually expedient work.

We as a team know the dangers, the deterioration of ozone layer and of overall greenhouse effect.

Our slogan regarding all such issue is:

## COMPANY'S CAPABILITIES AND SERVICES

### 1. CIVIL WORKS:

Our company has extensive experience and ability in the management and implementation of construction works including:

- \* Commercial , residential and public buildings (including all civil works, electrical , water , sanitary services, elevators, air conditioning and all related finishing works).
- \* Earthworks , concrete and asphalt works for all projects (roads, bridges and infrastructure).
- \* Drainage systems and networks of raw water, potable water, including piping, manholes construction, as well as construction of water treatment plants , pumping stations, and all types of storage tanks.
- \* Piles erection and installation.
- \* Special civil infrastructure works for oil and gas fields in all its facilities.

## COMPANY'S CAPABILITIES AND SERVICES

### 2. ELECTRICAL WORKS:

Our company has experience and competence in the management and implementation of the various electrical works, through:

- \* Power distribution lines, cable laying work, connectivity and electrical wiring.
- \* Installation of the control panels and operating gauges and switches and electrical outlets operating electrical stations.
- \* Medium and high-voltage installations.
- \* Fiber-optic cables and all related works.
- \* All preparatory, executive and final work in the area of electricity and power outlets.

#### **4. MECHANICAL WORKS:**

Our company has experience and competence in managing and implementing various mechanical works through:

- \* Installation of heating, ventilation and cooling devices.
- \* Works of all types of pipes.
- \* All inspection and control works.
- \* Installation of electrical stations for power generation with all its accessories and steel structures.

The mechanical works sector is also characterized by the comprehensive quality of its creativity in design, supply, installation, duct work and maintenance for the central air conditioning system and refrigeration devices of various forms for buildings, factories and major companies.

A selection of technicians specialized in maintenance work for these devices

### 5. SANITARY WORKS:

Our company has experience and competence in the management and implementation of various health business, through:-

- \* installation and operation of treatment units and treatment of sewage water, sanitation and drinking water.
- \* Potable and sewage networks.
- \* Testing and operating of all types of networks.

## ***6. FIRE ALARM AND FIRE FIGHTING SYSTEMS:***

We have staff with extensive experience in this field and has the ability to design and implementation.

## ***7. DESIGNS, STUDIES, MANAGEMENT AND QUALITY CONTROL:***

We have specialist staff working on the preparation of designs and studies in close cooperation with the competent engineers, executives and cadres of the relationship which has a distinctive experience and competence, and through:

- \* Prepare reports for proposed projects, which include surveying works , soil investigations, and all tests required for design process.
- \* Designs, shop drawings, specifications and bills of quantities preparation.
- \* Projects planning , project management, follow-up implementation and updating.
- \* Quality control management for all projects and includes supervision, auditing, and conduct the necessary tests according to the standards as per contracts and clients requirements, documentation and assembling documents closure of project files (Close Out Documents).

## 7. DESIGN PROGRAM:

The company has completed and successfully lot of special projects design and construction program, it has many of the advisory and technical offices known to work with our company through a close relationship based on mutual care and cooperation to work together in the implementation of many of the important projects in the areas of:

- Architecture.
- Structures and compositions.
- Electricity.
- Mechanics.
- Communication and control.

Our company is the personal benefit has been made outside the framework of the application of this program, as customers documented requirements and recommendations that they want to implement, our company is preparing the required designs in preparation for final approval in line with the customer's requirements, and then the company issuing the final designs for implementation, according to what was agreed upon.

That our consultants and our associates are working through modern engineering techniques and the most adaptable to their work through the latest drawings, designs and analyses input and accounts programs and spreadsheets to work effectively for the formulation of all the required documents.

In addition, the consultants and our associates are working always through a permanent monitoring of the quality of quality and record all variations depending on the supplied materials and methods of construction techniques, where the scientific assessment will be present at the end of each stage to find out possible ways to improve the work assigned to them and to the fullest and to serve the interests and customer satisfaction.

## ﴿ SPECIALIZED SERVICES OF THE COMPANY ﴾

- Designing and execution different buildings specially the residential complexes, building s, Schools, Hotels, Health center, residential complexes, cold and ordinary stores and ceilings.
- The establishment of drinking water systems and processing all accessories.
- The establishment of heavy water systems and processing all accessories.
- Supplying, Erecting and operating the electrical transformer stations of low, middle and high tension lines.
- Supplying and erecting the electrical generators in all sizes and from the best international origins and with capacities varying between 20 KVA and up to 2000 KVA
- To construct drinking water purification station and to supply all its equipments.
- To construct the heavy water pumping stations, Sewerage and supplying all its equipments.
- Different roads works which include planning and leveling, pavement and the works of the central reservation and pathways
- Execution of different projects of rehabilitations of buildings and Services establishment including the rehabilitation of buildings which had been damaged as a result of the circumstances which Iraq had passed through lately.
- Designing and execution of heating systems, Supplying of all its necessities including the central cooling appliances in its different capacities and sizes.
- Designing and execution of different decorations works and the work of the Islamic and Moroccan engraving for the houses, departments, Factories, exhibitions, Hotels, Hospitals, School, Conference halls and governmental buildings.
- To supply all kinds of building materials, Appliances, Equipments and Furniture's Design
- Execute and Supply no movable and movable caravans for different uses
- Supply and Supply no movable and movable caravans for different uses
- Extend oil and gas pipelines and processing all its accessories.
- Create and processing tanks of various sizes and measurements.

## “ ADMINISTRATION AND ORGANIZATION ”

In order for our Company to insure implementing the requirements of our clients in the best means, they employed the teams of high qualifications and long experiences in different specializations such as administrative, constructional, Architectural, Civil, Electrical and Mechanical Engineering.

And this team is supported by number of technical supervisors, specialized draftsmen which help to respond to the necessities and technical requirements of the projects with extreme speed and efficiency in addition to the capability of preparing the drawing and designs inside the company according to the request of the clients. All to ensure sure executing and completing the projects in full according to the highest standards of quality and accuracy.

## “ THE OBJECTIVE OF THE COMPANY ”

To establish good and excellent relations in what concerns the contracting sector with the departments with whom it deals with in order to reach to the best performance and presenting the highest standards from services in order to progress with the highest slandered in order to progress its projects in any work site, and active participation in the campaign of reconstructing Iraq and to follow up the progress in the infrastructure

## “ THE CAPABILITIES OF THE COMPANY ”

High Capital of the Company with Big banking facilities in some of the private banks and also the existence of foreign relations with foreign and international companies.

## WORKMANSHIP AND FACILITIES

- 1- Supervision on the execution.
- 2- Preparation of the rehabilitation documents
- 3- Management of the projects.
- 4- Control on costing and execution.
- 5- Constructional organization.
- 6- Management of execution in the sites.
- 7- Inspection and selection.

## SURVEYING WORKS

The survey work is divided into two parts: 1. Survey 2. A stake out. In general, the cadastral survey is the one that is used in the construction of engineering projects (buildings, roads, bridges, etc.) and to raise the parameters of these projects and make the required surveys by using surveying equipment (surveying with tape, surveying with a compass, surveying with theodolite, surveying the comprehensive station, raising GPS surveyors, surveying with aerial photos, surveying by satellite and others).

## MANAGEMENT OF THE PROJECTS

- 1- Preparing the designing suggestions for the quotation and primary costs by using the most modern technology in preparing pre-contracting documents.
- 2- Preparing the preferred designs and drawing which are equivalent to what is requested by the local commission.
- 3- Placing the specialized technicians with the executing works team which realize the almost benefit to the project

# THE SERVICES

## A- The Studies

- 1- Preparing the Feasibility studies.
- 2- Preparing primary drawings.
- 3- Documents for submitting offers.
- 4- Offers Appraisal.

## B- Planning

- 1- Regional planning.
- 2- Cities' planning.
- 3- Architectural planning.
- 4- Urban Designs and coordination of sites.

## C- Architecture

- 1- Designing of commercial buildings.
- 2- Designing of Touristic buildings.
- 3- Designing of administrative building.
- 4- Designing Residential complexes and Vilas.

## D- Services of the Buildings

- 1- Mechanical and Electrical Engineering.
- 2- Distribution of electrical power.
- 3- Air-conditioning and ventilation.
- 4- Distribution of water (Hot and cold)
- 5- System of feeding and dispensing.
- 6- Communication Systems.
- 7- Fire protection System.
- 8- Fire alarm system.
- 9- Central Gas System.
- 10- Buildings management

## E- Constructional Engineering

- 1- Constructing all kinds of buildings and execute sanitary sewerage (Water and Sewerage nets, and roads pavements).
- 2- Special constructional Engineering.
- 3- Foundations and soil.
- 4- Concrete works
- 5- Constructional appraisal

## F- Electrical Services

Supplying and executing 33 KVI, 132 KVI and 400 KVI high voltage lines, as well as the supply and implementation of electric power conversion stations, and the supply and implementation of mobile power stations.

### ▣ SAFETY COMMITMENT ▣

Qimat Shua'a Altaaqa Company is dedicated to safety for both personnel and work environment, It's safety commitment is maintained through number of measures being adopted by the company safety education/orientation, counselling, and proper motivation are the guiding policy in the enforcement and implementation of the company's safety and loss preventive program in order that none of its procedures, practices or method of work will expose any employee to unnecessary hazards.
